

**International Tribocorrosion Conference 2019  
And EFC WP18 Tribocorrosion Session  
at Eurocorr2019, Sevilla (Spain) 9-13 September 2019**

**CALL FOR PAPERS**

It is our great pleasure to announce the 2019 Tribocorrosion joint event gathering the successful series of International Tribocorrosion Conferences, (Hyderabad 2006, Vienna 2009, Atlanta 2012, Glasgow 2014, Hyderabad 2016) and the Eurocorr sessions organised by the Working Party 18 on Tribocorrosion of the European Federation of Corrosion.

This event will offer an exceptional platform for the scientific exchange between corrosionists and tribologists from both academia and industry interested in fundamental issues and applications related to tribocorrosion.

Delegates will not only have the opportunity to follow the regular oral and poster sessions but also to joint an introductory course to tribocorrosion on the event eve and a business meeting where industrial relevant issues will be discussed.

We invite talks covering the various issues related to tribocorrosion including but not limited to following topics:

- Erosion-corrosion, wear-corrosion interactions
- First principle, multiscale, mechanistic and numerical modelling of tribocorrosion
- Tribocorrosion experimental and monitoring techniques
- Materials and coatings for tribocorrosion
- Tribocorrosion protection
- Biomedical implants
- Marine/offshore installations,
- Materials extraction and forming

Papers have to be submitted till 16.1.2019 through the Eurocorr2019 website (<https://eurocorr.org/EUROCORR+2019.html>). Please, choose the section "Tribocorrosion".

We are looking forward to your contribution and participation in EUROCORR 2019 "New times, new materials, new corrosion challenges" on September 9–13, 2019, in Seville, Spain

Best regards,

Dr S. Mischler  
Chair WP18 of EFC
